

## ABOUT US

Posz Law Group provides a full range of intellectual property services for foreign corporations, U.S. corporations and individuals alike. We represent clients on patent, trademark, copyright and related transactional matters. Since the firm has forged relationships with foreign patent firms around the world, we are able to secure protection for intellectual property rights on a global basis.

Our attorneys are experienced in all technologies, including mechanical, electrical, chemical, computer hardware and software, and biotechnology. We counsel clients on the procurement and enforcement of patent rights both within and outside the U.S., including those rights afforded under the Patent Cooperation Treaty (PCT). Our practice includes securing valuable intellectual property rights; providing expert opinions on the issues of patent validity and infringement; drafting patent licensing agreements; providing counsel on patent interference and litigation strategy.

Our attorneys have a wealth of knowledge and experience in their respective areas of practice. They acquired their knowledge and experience while working at well-known law firms; at corporations as in-house patent counsel and/or at the U.S. Patent and Trademark Office as patent examiners.
